FINDINGS OVERVIEW

SEVERITY	AREA	WHAT DOES THIS MEAN?	STATUS
MEDIUM	Network Connection Resilience	The service relies on a single blockchain connection with no backup. If that connection goes down temporarily, the service pauses until it recovers on the next scheduled cycle. No funds are at risk during the pause.	Planned
LOW	Test File References Production Service	A test file contains a direct reference to the production database URL instead of using a placeholder. This is a public address (not a secret) and only affects the test environment, not production.	Planned
